

Outdoor Siren with Strobe

Features That Make a Difference:

- PowerG* robust industry leading commercial grade wireless technology
- Sleek design and robust weatherproof housing (IP55)
- 110dB Siren with strobe light
- Long-life lithium batteries
- Compatible with PowerSeries Neo systems

The power of PowerG*:

- Multichannel, Frequency Hopping Spread Spectrum technology - to overcome frequency blocking and interference
- Adaptive Transmission Power - for battery life preservation
- High transmission ranges - for reliable communication within up to 2km/2187 yards line-of-sight
- TDMA synchronized communication technology - to prevent message collisions
- 128 bit AES encryption - high level protection against analysis tools and digital attacks

Outdoor Siren with Strobe

The Outdoor Siren is a fully supervised Wireless PowerG Outdoor Siren, designed for installation in areas in which wiring is difficult or impossible. The Outdoor Siren is a self-powered wireless outdoor siren that provides the perfect security solution for home owners looking for an external siren that is both affordable and easy to install. The Outdoor Siren combines form and function to provide improved protection against intruders, before they get the chance to enter the home.

The Outdoor Siren Wireless PowerG Outdoor Siren is equipped with a visible signal quality LED indicator that lets the installer choose the optimal location for installation, eliminating the effort of going back and forth to the keypad. Additionally, device configuration is quick and easy with no hardware switches or need to re-open devices. All device configuration settings are handled on the keypad with no need to re-open the device once installed.

Differentiated audible and visual alerts are emitted in the case of Fire, Carbon Monoxide, Burglary and Flood events, ensuring that no alert goes unnoticed. In addition to providing a loud audible alert, the Outdoor Siren also contains a built-in high-power strobe light providing a visual alert of the event.

Weather-Proof Design

The Outdoor Siren provides an Ingress Protection (IP) of IP55. An Ingress Protection Rating provides information on how well the siren is equipped to withstand the elements that it is exposed to. A rating of IP55 in particular ensures the unimpaired functionality of the Outdoor Siren PowerG wireless outdoor siren in the presence of dust and water jets.

SPECIFICATIONS	
Dimensions	295 x 186 x 63mm (11.63 x 7.31 x 2.5 in.)
Battery Life	up to 8 years (typical use)
Battery Type	3.6V, Li-Thionyl Chloride 0-102710
Weight	970g (34oz)
Operating Temperature	-33°C to 70°C (-27.4°F to 158°F)

APPROVALS

FCC/IC, UL/ULC, CSFM

Compatibility

PowerSeries Neo Systems

PowerSeries Neo is Security Redefined

PowerSeries Neo by DSC redefines intrusion security by combining the flexibility of a modular, hardwired system with the simplicity of a wide range of wireless devices and peripherals, resulting in the most comprehensive hybrid system available in the market today.

This brand new and exceptionally flexible platform leverages the superior capabilities of PowerG – the industry’s leading-edge wireless intrusion technology. Innovative alarm verification solutions, together with an exceptionally comprehensive remote service software suite, make PowerSeries Neo the ideal first-class solution for residential and scalable commercial installations.
